Index

Alphabetic phonics curriculum, 228–29; dividing words into syllables in, 229–40
Antidyslexia movement, 25–26
The Aquarian Conspiracy (Ferguson), 14

Baker, L. A., 121
Bateman, B., 227
Bavarian Dyslexia Association, 26–27
Bishop, D., 166
Bradley, L., 211, 213, 220
Bryant, P., 211, 213, 220
Butkowsky, S., 164
Butterworth, G., 166

Childs, Sally, tribute to, 3–7
Classroom intervention, cost of, 18
Cognitive deficits of reading-disabled children, 155
Cognitive skills: distributions of reading-related, 169–70; cascade of interacting deficits in, 161; multidimensional continuity of reading-related, 168–72; reading and individual differences in, 154
Cole, Edwin, presentation of Orton Award for 1987 to Alice H. Garside, viii–ix
Colorado Family Reading Study, 121–22
Comprehension: listening, 37; of technical writing, 256
Cox, Aylett R., tribute to Sally Childs, 3–4
Criteria to define dyslexic samples, 169

Daycare with aid for dyslexics, 27–28
Decoding: alternative model for instruction in, 265–74; instruction in (grades 2 or 3), 265; framework for, 258
DeFries, J. C., 121
de Hirsch, K., 17
Delay in acquisition of spatial and temporal information, 183
Developmental lag: hypothesis, 147; model, 170
Dewey, John, 179
Dweck, C., 164

Dyslexia: artifactual "hump" in distribution of, 169; doubt about existence of, 34–35, 47; history of, 22–26; linguistic uncertainty in, 62; reading development model and subtypes of, 141–43; *see also* Antidyslexia movement; Reading disability
Dyslexics: classification into subgroups, 148–50; criteria to define samples of, 169; phonological processing problems of, 150–51; with problems in visual/orthographic accessing of the lexicon, 160; program for literacy for, 228–29; spelling deficits of, 150–51; teaching written language to, 229; visual processing problems and, 151

Educational achievement, 161
Ellis, A. W., 169
Exposition: building blocks of, 247–48; meaning and importance of, 244–46; structure of, 246

Ferguson, M., 14
Funding of programs, 18

Garside, Alice H.: response to receiving Orton Award for 1987, xii–xiv; Samuel T. Orton Award for 1987, ix–xi
Gillingham, Anna, 9
Grammaticality judgment test, 81–83
Grapheme-phoneme conversion, 36
Greene, Tori, 9, 16, 17

Illiterate America (Kozol), 8
Illiterates in U.S., 8
Instruction for people with language learning problem, principles of, 12
Intelligence: metacognitive awareness and, 157; of at-risk children (SEARCH and), 186–87
Intervention: changes in language comprehension and production due to early, 203; classroom, 18; importance of early, 194; principles of

Intervention—continued
language, 196–203; screening procedures to find children in need of, 182; *see also* SEARCH
IQ: reading and, 168; statistical distribution of reading and, 170

Jansky, J., 17
Juel, C., 166–67

Kindergarten reading readiness, clinical suggestions regarding, 220–22
Koontz, Alice, tribute to Sally Childs, 6
Kozol, Jonathan, 8

LaBuda, M. C., 121
Language comprehension and production changes due to early intervention, 203
Language development, linguistic and academic success and early, 194
Learning-disabled college students, 276–77, 283–84; diagnosis of, 278–79, 282–83; profile of successful, 280–81; referral, screening and diagnosis at Dartmouth, 281–83; services and accommodations at Dartmouth, 280–81
Language disability: assessment procedures and identification of, 194–96; subtypes of, 139–40
Language-learning problems, principles of instruction for people with, 12
Language skills: dyslexics' lack of competence in, 62–64; poor readers' problems with basic, 74; at the sentence level, 74–76
Learning disabilities: antecedents for, 183; assumptions in screening for early identification of, 182; early identification of, 181–83
Legasthenia Aid Circle, 27–30
Letters: knowledge of names and sounds of, 217–18
Lexical tasks, dyslexia and, 60–62
Licht, B., 164
Linder, M., 23–24
Linguistic awareness, 209
Listening comprehension, 37; poor readers with normal, 42, 44, 45–47
Literacy: elements of, 244; model program for, 9–19; proving students' mastery of, 239–40
Lundberg, I., 211, 220

McGee, R., 168
Matthew effects: defined, 161; reading and, 161–66; recent evidence on reading and, 166–68
Memory: phonological codes in short-term, 159; short-term, 77–79, 79–80; test of short-term, 80–81
Metacognitive functioning, 156–57
Metalinguistic ability, 209; poor readers and, 91
Morrison, Fred, 156
Multidimensional continuity of reading-related cognitive skills, 168–72

Naming ability, 51–53; testing, 54–57
Nathan, R. G., 170

Oka, E., 164
Olofsson, A., 211, 220
Oral language, difficulties with, 51–54, 65, 74
Orthographic measures, speed in, 150
Orthographic processing, deficits in, 160
Orthography, structure of English, 159–66
Orton Awards for 1987, Samuel T., viii–xiv
Orton, Samuel T., illiteracy and, 9

Paris, S., 164
Peers, ability of students', 165
Phoneme segmentation, training in (for kindergarten child), 217
Phonics, expansion of alphabetic, 240
Phonological awareness: specific reading disability and, 160; success in early reading stages and, 209–10
Phonological-core variable-deficit conceptualization, 170–71
Phonological processes: as predictive of reading skills, 159–60; problems with, 150–51; reading disability and, 158–61; side effects of lack of skill in, 161–62
Phonological segmentation testing, 80
Prediction of reading ability, phonological processes and, 159–60
Project Read, 14, 18

Rawson, Margaret, 22, 28; tribute to Sally Childs by, 6–7
Readers, continuum of types of, 170–71
Reading: ability to correct improper grammar and its relation to skill

in, 89–92; brain/cognitive deficit and, 155; children's attitudes toward, 167; cognitive skill differences and, 154; componential analysis of, 96–99, 107, 114–17; as contributor to language and cognitive skills, 162; differential longitudinal stability in, 123, 125–29, 130; effects of phoneme segmentation and letter sound training in kindergarten on, 218–20; general language skills as limiting factor in, 162; IQ and, 168; key to fluent, 158; Matthew effects on, 161–66, 166–68; metalinguistic ability and ability in, 91; multi-levels and multi-components of, 114–15; preacademic subskills of, 187–88; tests of, 80; tests of components of, 38–42; training in components of, 116–17; volume of experience and development of skill in, 163–64; word structure and word knowledge and, 115–16
Reading comprehension, visually unfamiliar words of more than one syllable and, 227
Reading development, model of, 140–41, 170–71
Reading disability: assumption of specificity and, 155; as cause of performance deficits, 161; familial nature of, 131–33; framework for controversial issues about, 171; importance of etiology of, 137; insufficiently selective procedures for defining, 161; modularity and, 157–58; motivational side effects of, 164; phonological awareness and specific, 160; phonological processes and, 158–61; places to look for key to, 157–58; subtypes of, 139–40; teaching adolescents and adults with, 275; test for genetic tiology of, 133; weaknesses underlying, 92
Reading subskills, significance of differing profiles of, 169
Research: assumption of specificity in, 171; longitudinal, 166–67
Richardson, Sylvia O., presentation of Orton Award for 1987 to Lucius Waites, xi–xiv
Rutter, M., 34, 164, 165–66

Saunders, Roger E., tribute to Sally Childs, 5–6
Schenk-Danzinger, L., 23, 25–26
Schonell, F. J., 34
Schools, effects of social structure of, 164
Screening procedures for children in need of intervention, 182; *see also* SEARCH
SEARCH, 182, 183–84, 186–91
Sentences, error correction test for ungrammatical, 83–84; *see also* Language skills at the sentence level
SES. *See* Socioeconomic status (SES)
Share, D. L., 168
Silva, P. A., 168
Socioeconomic status (SES): Matthews effects and, 164–65; SEARCH and, 183
Specific reading retardation. *See* Dyslexia
Spelling: dyslexics' lack of deficits in, 150; framework for, 258
Spelling-to-sound mapping ability, side effects of lack of skill in, 161–62
Spoken language. *See* Oral language; Naming ability
Stanovich, K. E., 170
Stillman, Bessie, 9
Students, ability of peers of, 165
Syllables: dividing two-syllable base words into, 231–32; formulas for dividing words into, 229–35, 235–38; preparing to divide words into, 230–31; shifting accent to second, 232–35
Syntactic competence, measuring, 76–79

Teachers' accountability, 239–40
Teaching: model for teaching adolescents and adults with reading disabilities, 275; textbooks and, 154–56
Technical writing, comprehension of, 256
Textbooks: comprehension and, 256; contemporary American, 250–52; design of, 248–50; teaching and, 254–56; treatment of life cycles in American and Japanese, 252–53
Torgesen, J., 156, 162, 164
Twin studies, 132–33, 133–36, 136–38

Vala-Rossi, M., 170
Visual perception, orthographic processing deficits and problems with, 160
Visual processing of print, use of phonological information and, 147–48

Visual processing problems, rarity of (in dyslexics), 151

Waites, Lucius: response on receiving Orton Award, xvii; Samuel T. Orton Award for 1987, xi–xiv
Walberg, Herb, 161
Welchman, Marion, tribute to Sally Childs, 4–5
Willows, D., 164
WISC, dyslexic children and vocabulary subtest of, 61
Word recognition, adult processes of, 158
Words: deliberate exaggeration of individual, 238; dividing into easily pronounced syllables, 230–31; dividing two-syllable base, 231–32; identifying affixes of, 239; reading comprehension and visually unfamiliar, 227; shifting accents in, 232–35; students' knowledge of structure of, 264–66; three-syllable base, 238

Yule, W., 34

Zolman, J. E., 170
